Cleaning & Care

CLEANING AND CARE INSTRUCTIONS

Thank you for your Rock Run Cabinetry LLC purchase. Regular cleaning and maintenance promotes the beauty and longevity of your products and ensures a lifetime of use.

We recommend regular care and cleaning of your products to promote product life.

- Routine cleaning can be accomplished by rinsing away dirt and debris. Follow this by gently wiping with a damp, non-abrasive cloth or sponge using warm water. Follow this by towel drying to prevent water spotting.
- If additional cleaning is necessary, mild soap can be used. Caution – the use of solvents, abrasives, or dish washer detergent will damage the product's finish.
- Always test any cleaning solution in an inconspicuous area before applying to the entire product.

Do not store objects on the surface for any extended periods of time as these can trap moisture and debris.

Do not place hot items on any part of the finished surface. Damage created by hot items can be minimized by cleaning and buffing, but will typically never be eliminated. This type of damage will not be covered under warranty.

CAUTION – Ceramic materials and other abrasive textures can cause damage to the painted surfaces.

CAUTION – Take care to never let hot ash come in contact with the painted surface of this product. In addition, wet ash can become corrosive over time, so keep all surfaces free of ash debris.

CAUTION – Appliance and stainless steel cleaning solvents are harmful to your Rock Run Cabinetry product's finish and should not come in contact with the surface at any time. Take care to spray the solvent onto a cloth and wipe only on the appliance surface.

Minimize the natural aging of your product by storing your cabinet in a dry, shaded area to reduce fading. Please contact your dealer for details.

Light or superficial scratches to the finish are likely to occur during normal use and do not affect the integrity of the product.
